

Annex 1. Outline of data and resources collated during study, by theme. Datasets in italic characters have been used for map creation, and datasets in bold characters have been added during the review study.

Protected areas

Dataset Description	Data Source
<i>National and International Protected Areas locational (centroid) data for Mali, Gambia, Chad, Sierra Leone, Togo, Burkina Faso, Cote d'Ivoire and Ghana from the World Database on Protected Areas (WDPA) Annual Release 2010.*</i>	<i>World Database on Protected Areas (WDPA) Annual Release 2010. The WDPA is a joint product of UNEP and IUCN, prepared by UNEP-WCMC, supported by IUCN WCPA and working with Governments, the Secretariats of MEAs and collaborating NGOs.</i>
<i>National and International Protected Areas boundary data for Mali, Gambia, Chad, Sierra Leone Togo, Burkina Faso, Cote d'Ivoire and Ghana from the World Database on Protected Areas (WDPA) Annual Release 2010.*</i>	
Data source information for National and International Protected Areas from the World Database on Protected Areas (WDPA) Annual Release 2010. Link to feature datasets via the metadataid field.	
Protected areas covering study area extracted from the WDPA. Includes key attribute fields and source information. The list of protected areas are provided in Annex 2 of this report, which includes the designation type, IUCN category, status, year, reported area and GIS area.	World Database on Protected Areas (WDPA) Annual Release 2010.
Revised guidelines on the assigning of IUCN protected area management categories including the new IUCN protected area definition.	Dudley, N. (Editor) (2008). Guidelines for Applying Protected Area Management Categories. Gland, Switzerland.
Press release on the launch of the Sierra Leone-Liberia Trans-boundary Peace Park Project in May 2009. The Peace Park unites the Gola Forest Reserve in Sierra Leone (75,000 ha) and the Lofa and Foya Forest Reserves in Liberia (80,000 ha and 100,000 ha respectively), with additional forest to provide corridors for the movement of wildlife between them.	http://www.birdlife.org/news/pr/2009/05/peace_park_west_africa_pr.html

* Maps available only for the national sites.

Biodiversity and Conservation Priorities

Description of Dataset	Data Source
<i>Global Land Cover dataset has been clipped to West Africa extent. This global Land Cover map is derived by an automatic and regionally-tuned classification of a MERIS FR time series (2004 – 2006). Its 22 land cover classes are defined with the UN Land Cover Classification System (LCCS). See accompanying documentation for more information.</i>	<i>Source Data: © ESA / ESA Globcover Project, led by MEDIAS-France/Postel</i>
<i>Biodiversity Hotspots are regions known to hold especially high numbers of species found nowhere else, yet their remaining habitat combined covers a little more than two percent of Earth's land surface. This dataset has been clipped to the West Africa extent.</i>	<i>Conservation Synthesis, Center for Applied Biodiversity Science at Conservation International, 2004.</i>
<i>IUCN species Richness Grid. The low resolution of the Species Richness grid prevents display at a county level.</i>	
KBA guidelines IUCN (2007). These guidelines draw on cutting-edge science as well as methods developed in a number of different organizations, and are already implemented as Important Bird Areas and Important Plant Areas in more than 170 countries. The Key Biodiversity Areas framework provides a bottom-up approach to extend the bird and plant work to date to identify globally	Langhammer, P.F. et al. (2007). Identification and Gap Analysis of Key Biodiversity Areas: Targets for Comprehensive Protected Area Systems. Gland, Switzerland: IUCN.

significant sites for biodiversity.	
<i>WWF's Global 200 Ecoregions is a first attempt to identify a set of ecoregions whose conservation would achieve the goal of saving a broad diversity of the Earth's ecosystems. These ecoregions include those with exceptional levels of biodiversity, such as high species richness or endemism, or those with unusual ecological or evolutionary phenomena. This dataset contains the Terrestrial G200 ecoregions and has been clipped to the West Africa extent.</i>	<i>Olson, D. M. and E. Dinerstein. The Global 200: Priority ecoregions for global conservation. (PDF file) Annals of the Missouri Botanical Garden 89:125-126.</i>
'Terrestrial Ecoregions of the World'. This paper outlines the delineation and selection of the WWF G200 ecoregions.	Olson, D. M., Dinerstein, E., et al (2000) Terrestrial Ecoregions of the World: A New Map of Life on Earth, Bioscience. Vol. 51. No. 11
<i>Important Bird Areas (IBAs) in West Africa. Important Bird Areas (IBAs) are a particularly effective way of identifying conservation priorities. A site is recognised as an IBA only if it meets certain criteria, based on the occurrence of key bird species that are vulnerable to global extinction or whose populations are otherwise irreplaceable.</i>	<i>BirdLife International (2009). West African Important Bird Area (IBA) data extracted from the World Bird Database on 4th June 2009. For further information visit www.birdlife.org.</i>
<i>The Last of the Wild represent the 10% wildest areas in each biome. Continental scale dataset for Africa has been downloaded for this study</i>	<i>Last of the Wild Data Version 2, 2005 (LWP-2): Global Last of the Wild (LTW). Wildlife Conservation (WCS) and Center for International Earth Science Information Network (CIESIN). Downloaded from http://sedac.ciesin.columbia.edu/wildareas/</i>

Climate change and Human Population

Description of Dataset	Data Source
The UNDP climate change country profiles were available for Chad, Sierra Leone, Gambia, Mali and Togo. The profiles were funded jointly between the National Communications Support Program (NCSP) and the UK Dept. for International Development (DfID) and were developed to address the climate change information gap in many developing countries by making use of existing climate data to generate country-level data plots from the most up-to-date climate observations and the multi-model projections from the WCRP CMIP3 archive.	McSweeney, C., New, N. and Lizcano, G. (2008) 'UNDP Climate Change Profiles', School of Geography and Environment, University of Oxford and Tyndall Centre for Climate Change Research. Downloaded from http://country-profiles.geog.ox.ac.uk/
'Projected impacts of climate change on a continent-wide protected area network'. The study investigated the projected impacts of climate change on a continent wide protected area network. By using modelled projected shifts in the distributions of sub-Saharan Africa's entire breeding avifauna, it showed that species turnover across the continents Important Bird Area (IBA) network is likely to vary regionally and will be substantial at many sites (> 50% at 42% of IBAs by 2085 for priority species). It demonstrated that rigorously defined networks of protected areas can play a key role in mitigating the worst impacts of climate change on biodiversity.	Hole, D.G., et al (2009) 'Projected impacts of climate change on a continent-wide protected area network' Ecology Letters, 12:420-443.
'In search of shelter'. This report written was written by researchers at CIESIN, the United Nations University, and CARE International. The report explores how climate change is already causing people to leave their homes, and details some of the specific ways displacement may occur over the next decades.	In search of shelter: mapping the effects of climate change on human migration. 2008. Cooperative for Assistance and Relief Everywhere, Inc. (CARE). Used by permission. http://www.careclimatechange.org http://www.ciesin.columbia.edu/documents/clim-migr-report-june09_final.pdf

<p>The Human Footprint Index expresses as a percentage the relative human Influence in every biome on the land's surface. Continental scale dataset for Africa has been downloaded for this study.</p>	<p>Last of the Wild Data Version 2, 2005 (LWP-2): Global Human Footprint data set (HF). Wildlife Conservation (WCS) and Center for International Earth Science Information Network (CIESIN). Downloaded from http://sedac.ciesin.columbia.edu/wildar/eas/</p>
<p><i>The Human Influence Index (HII) is a measure of direct human influence on terrestrial ecosystems. Continental scale dataset for Africa has been downloaded for this study.</i></p>	<p><i>Last of the Wild Data Version 2, 2005 (LWP-2): Global Human Influence Index (HII). Wildlife Conservation (WCS) and Center for International Earth Science Information Network (CIESIN). Downloaded from http://sedac.ciesin.columbia.edu/wildar/eas/</i></p>
<p>Gridded Population of the World, Version 3 (GPWv3) consists of estimates of human population for the years 1990, 1995, and 2000 by 2.5 arc-minute grid cells and associated datasets dated circa 2000. In addition there are projected future estimates for 2010 and 2015. For this study population count grids (raw counts) were downloaded for continental Africa for years: 1990, 1995, 2000, 2005, 2010, 2015.</p>	<p>Center for International Earth Science Information Network (CIESIN), Columbia University; and Centro Internacional de Agricultura Tropical (CIAT). 2005. Gridded Population of the World Version 3 (GPWv3): Population Grids. Palisades, NY: Socioeconomic Data and Applications Center (SEDAC), Columbia University. Available at http://sedac.ciesin.columbia.edu/gpw. (Downloaded May 2009).¹</p>
<p>Gridded Population of the World, Version 3 (GPWv3) consists of estimates of human population for the years 1990, 1995, and 2000 by 2.5 arc-minute grid cells and associated datasets dated circa 2000. In addition there are projected future estimates for 2010 and 2015. For this study population density grids (per square km) were downloaded for continental Africa for years: 1990, 1995, 2000, 2005, 2010, 2015.</p>	<p>Center for International Earth Science Information Network (CIESIN), Columbia University; and Centro Internacional de Agricultura Tropical (CIAT). 2005. Country based data

Description of Dataset	Data Source
<i>Locations of major cities for Mali, Gambia, Chad, Sierra Leone, Togo, Burkina Faso, Cote d'Ivoire and Ghana (1:15,000,000)</i>	ESRI Data and Maps 2006
<i>Country boundary dataset for Mali, Gambia, Chad, Sierra Leone, Togo, Burkina Faso, Cote d'Ivoire and Ghana from the Digital Chart of the World (1:1,000,000 scale).</i>	ESRI Data and Maps 2006
<i>Boundary dataset of countries surrounding area of interest to create a mask used for map display. Country dataset extracted from the Digital Chart of the World (1:1,000,000 scale).</i>	ESRI Data and Maps 2006
<i>Boundary line dataset of countries surrounding area of interest to create a mask used for map display. Country dataset extracted from the Digital Chart of the World (1:1,000,000 scale).</i>	ESRI Data and Maps 2006
<i>Bathymetry boundary dataset containing depth in meters. Use the Description field to symbolised depth intervals.</i>	ESRI Data and Maps 2006
<i>Line dataset of rivers for West Africa. Rivers dataset extracted from the Digital Chart of the World (1:1,000,000 scale).</i>	ESRI Data and Maps 2006
<i>Boundary dataset of water bodies for West Africa. Water bodies dataset extracted from the Digital Chart of the World (1:1,000,000 scale).</i>	ESRI Data and Maps 2006

Annex 2. List of protected areas within West Africa for the 8 countries. The protected areas for which polygons are provided are listed first, followed by the ones for which only data points are available. These are presented in alphabetical order following ISO standards country codes (BFA: Burkina Faso, CIV: Cote d'Ivoire, GHA: Ghana, GMB: Gambia, MLI: Mali, SLE: Sierra Leone, TCD: Chad, TGO: Togo). Protected areas which are marine or contain marine areas are indicated in bold characters.

	technologies.	W: http://science.conservation.org/portal/server.pt	
World Resources Institute (WRI)	Acquisition of up to date points of contact or data sources (governmental and NGO) on protected areas, climate change, land cover and wildlife demographics.	Susan Minnemeyer Associate II/GIS Manager People and Ecosystems World Resources Institute (WRI) 10 G Street NE Suite 800 Washington, DC 20002, USA E: susanm@wri.org W: www.wri.org/	Susan has been a main point of contact in WRI regarding protected areas and forest cover data for Central Africa.
WWF	<i>Acquisition of up to date points of contact or data sources (governmental and NGO) on protected areas, climate change, land cover and wildlife demographics.</i>	<i>Dr Neil Burgess Senior Conservation Scientist (Africa) c/o Conservation Science Group Zoology Department Cambridge University Downing Street Cambridge, CB2 3EJ, UK E: neil.burgess@wwfus.org</i>	<i>Neil has been a main point of contact in WWF regarding protected areas for Africa.</i>
Wetlands International Africa Office	Acquisition of up to date points of contact or data sources (governmental and NGO) on protected areas particularly Ramsar (wetland) sites.	Abdoulaye Ndiaye Capacity Development Officer and Wings over Wetlands Focal Point Wetlands International Africa Office Rue 111, Zone B, Villa N° 39B P.O. Box 25581 Dakar Fann, Senegal E: ablaywet@orange.sn W: http://wow.wetlands.org	The United Nations Environment Programme (UNEP) - with support from the Global Environment Facility (GEF), the Government of Germany, UNEP/AEWA and a range of other donors - is the implementing agency of WOW. UNEP-WCMC provides the technical leadership in the development of state-of-the-art IT tools for managing and increasing our knowledge on waterbird migrations.
Fondation Internationale du Banc d'Arguin	Acquisition of up to date points of contact or data sources (governmental and NGO) on protected areas.	Dr Charlotte Karibuhoya MPA Programme Coordinator - FIBA/PRCM c/IUCN Fondation Internationale du Banc d'Arguin Ave Bourguiba x Castors PO Box 3215 Dakar Senegal E: karibuhoye@lafiba.org	The World Commission on Protected Areas (WCPA) is the world's premier network of protected area expertise, administered by the IUCN Programme on Protected Areas. WCPA works by helping governments and others plan protected areas and integrate them into all sectors; by providing strategic advice to policy makers; by strengthening capacity and investment in protected areas; and by convening the diverse constituency of protected area stakeholders to address challenging issues. There are increasing efforts in Western and Central Africa to link the WCPA network with the activities of the IUCN regional office.
Conservation Society of Sierra Leone	Acquisition of up to date points of contact or data sources (governmental and NGO) on transboundary protected areas, conservation	Daniel Siaffa Executive Director Conservation Society of Sierra Leone	The Conservation Society of Sierra Leone (CSSL) was formed in 1986 in response to the need for a local conservation organization. They are part of the

	priority and biodiversity.	Sierra Leone E: ddsiaffa@yahoo.co.uk ; cssl_03@sierratel.sl	BirdLife African Partnership and worked with and Society for the Conservation of Nature in Liberia, the RSPB (BirdLife in the UK), Vogelbescherming (BirdLife in The Netherlands), the Forest Development Authority (FDA) of Liberia, and the Forestry Division in Sierra Leone to establish the Sierra Leone-Liberia Trans-boundary Peace Park Project in May 2009. See http://www.birdlife.org/news/pr/2009/05/peace_park_west_africa_pr.html
Oxford University Centre for the Environment	Development and application of climate modelling in study region. Collaboration on the integration of the raw data produced for the UNDP Climate Change reports into modelling and mapping tools developed for study.	Dr Mark New, Reader in Climate Science and Dr Carol McSweeney, Researcher School of Geography and the Environment Oxford University Centre for the Environment South Parks Road Oxford OX1 3QY United Kingdom E: mark.new@ouce.ox.ac.uk ; carol.mcsweeney@ouce.ox.ac.uk	The UNDP climate change country profiles were available for Chad, Sierra Leone, Gambia, Mali and Togo. The profiles were funded jointly between the National Communications Support Program (NCSP) and the UK Dept. for International Development (DfID) and were developed to address the climate change information gap in many developing countries by making use of existing climate data to generate country-level data plots from the most up-to-date climate observations and the multi-model projections from the WCRP CMIP3 archive. Downloaded from http://country-profiles.geog.ox.ac.uk/

Annex 5. Outline of maps created during the baseline study and the review (indicated in italic characters).

Title	Description/Notes	Formats
West Africa regional map showing the Human Influence Index (v2) with Protected Areas.	The Human Influence Index (HII) is a measure of direct human influence on terrestrial ecosystems, produced by Wildlife Conservation Society (WCS) and the Columbia University Center for International Earth Science Information Network (CIESIN).	ArcMap Document (.mxd) Hard copy A0 Map image file (JPEG and TIFF, 300 dpi)
Country level maps showing the Human Influence Index (v2) with Protected Areas.	The Human Influence Index (HII) is a measure of direct human influence on terrestrial ecosystems, produced by Wildlife Conservation Society (WCS) and the Columbia University Center for International Earth Science Information Network (CIESIN).	ArcMap Document (.mxd) Map image file (JPEG and TIFF, 300 dpi)
West Africa regional map showing the Population Density (2000) with Protected Areas.	Population density grid for Africa in 2000 extracted from the Africa population database (UNEP/GRID).	ArcMap Document (.mxd) Hard copy A0 Map image file (JPEG and TIFF, 300 dpi)
Country level maps showing the Population Density (2000) with Protected Areas.	Population density grid for Africa in 2000 extracted from the Africa population database (UNEP/GRID).	ArcMap Document (.mxd) Map image file (JPEG and TIFF, 300 dpi)
West Africa regional map showing the Protected Areas with Land Cover.	Population density grid for Africa in 2000 extracted from the Africa population database (UNEP/GRID).	ArcMap Document (.mxd) Hard copy A0 Map image file (JPEG and TIFF, 300 dpi)
Country level maps showing the Protected Areas with Land Cover.	Population density grid for Africa in 2000 extracted from the Africa population database (UNEP/GRID).	ArcMap Document (.mxd) Map image file (JPEG and TIFF, 300 dpi)
West Africa regional map showing BirdLife's Important Bird Areas, Conservation International Biodiversity Hotspots, WWF Global 200 Ecoregions and Last of the Wild datasets.	The base dataset is a Digital Elevation Model (DEM).	ArcMap Document (.mxd) Hard copy A0 Map image file (JPEG and TIFF, 300 dpi)
Country level maps showing BirdLife's Important Bird Areas, Conservation International Biodiversity Hotspots, WWF Global 200 Ecoregions and Last of the Wild datasets.	The base dataset is a Digital Elevation Model (DEM).	ArcMap Document (.mxd) Map image file (JPEG and TIFF, 300 dpi)
<i>Regional map showing the protected areas network in West Africa as held in the World Database on Protected Areas (WDPA) plus additional data collected at UNEP-WCMC.</i>	<i>The World Database on Protected Areas (WDPA) is the most comprehensive global spatial dataset on marine and terrestrial protected areas available. The base dataset is a Digital Elevation Model (DEM) combined with a bathymetry layer.</i>	<i>ArcMap Document (.mxd) Hard copy A0, A4 Map image file (JPEG 300 dpi) Available in English and French</i>
<i>Regional level map showing the quality of protected areas data taken from the World Database on Protected Areas (WDPA): Protected Areas Data Quality Assessment</i>	<i>In assessing the quality of the data, three factors are taken into account: (a) the percentage of boundary data for each country; (b) the recency of the data; (c) the completeness of the attributes. The overall quality of a country's dataset is given by the sum of these three indicators</i>	<i>ArcMap Document (.mxd) Hard copy A0, A4 Map image file (JPEG 300 dpi) Available in English and French</i>
